Sir

Sub:- Improvement of water supply to Balageri-Lothalla Closepet Town

6/4
I have the honour to state that at present Balageri Lothalla area in Closepet Town is supplied with water through 2" 1½ and 1' G.I. pipe lines, and according to the report accompanying the sanitary engineer letter No 165/dated 21/22-3-1947, addressed to the president Closepet Municipality this system is found to be quite unsatisfactory due to the long length and the small section of the above sub main. In order to improve the water supply arrangement an estimate for Rs 663/- has been prepared by the Sanitary Engineer Bureau of sanitary engineering. I have been proposed by him to replace the existing pipe into with 3" C.I. and 2" G.I. pipe lines and that it is expected that when this work is done sufficient supply of water would be ensured and the inconveniences now felt by the public of the area redressed.

In view of the urgency of the matter the Municipal Council Closepet have resolved at their meeting held on 14/11/1947 that taking into consideration the poor resources of the Municipality the Government may be approached for sanctioning a government grant of Rs 3315/- being one half of the estimated cost and the remaining half borne by the Municipality.

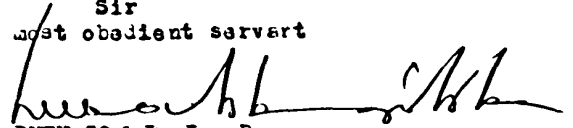

I therefore request that considering the above facts and since the Municipality has agreed to bear half of the cost the Government may kindly be pleased to sanction a grant of Rs 3315/- for the above purpose.

I have also asked the president Closepet Municipal Council to have their share of the cost credited to the Treasury for the said purpose in view of the fact that the official year is coming to a close and the work will have to be taken up soon after the sanction of Government is received.
